## Where to begin...

- Start with a vision.
- Create a list of features you would like to have in your home.
- Examine your current home and lifestyle.
- Think about a baseline budget.

*These methods will assist in defining your desires for a home.*

## Get Started...

Go to [www.abc-clc.com](http://www.abc-clc.com)  
to find a location nearest you.  
(also see back of brochure for location listings)

Give us a call or email, and we'll get you set-up  
with one of our drafting professionals.

## What to expect...

At Arrow Building Center it's all about delivering outstanding drafting and design services to customers in MN & WI. That starts with listening to what our clients want in their proposed project and working with them to create the design that fits their needs.

Our hands on approach provides an engaging and rewarding experience that is focused on delivering a complete set of working drawings while being considerate of the customer's budget and goals.

Built around you.®

We feature numerous quality brands and options to fit your budget, including Marvin Windows and Doors.

## OUR DESIGN PROCESS...

### Pre Design Meeting

Initial consultation; we'll discuss ideas & plan the basic structure of what you desire and the style of home that best suits your lifestyle. The initial meeting will take place at our office or your building site (if it is a remodel project) to discuss style, orientation, functionality, and overall floor plan size. We will go through our 'Drafting and Design Service Worksheet' to give you an estimate of what the design service will cost.

*\*A 50% down payment of the estimated drawing cost is required to proceed to the preliminary drawing stage.*

### Preliminary Drawing

Once your initial specifications are identified, we will draft a floor plan with minimal dimensions and front elevation of the project.

### Design Review

Review the design's room sizes, and over-all layout. Discuss any revisions that you would like to have made.

### Plan Revisions

If there are any changes that need to be made, we will revise the plan to achieve exactly what was discussed in the Design Review. (Up to 3 preliminary plans may be issued. After 3 revisions, an hourly drafting rate will be charged).

### Check Set Drawings

The remaining side views of the house and floor plans are created for review, prior to finalizing the design plan.

### Final Drawings

Finishing touches are added to make your plan ready for permit and construction. The final plan includes basement, floor plans, elevations, typical section, beam/header sizing and wall bracing. Site plans are drafted as needed. 4 sets of the final plans will be included.

*Note: An hourly drafting rate will occur for any revisions after the final drawing*
