8.1 Störungstabelle

Störung	Mögliche Ursache	Lösung
Im Wasserzuführgerät baut sich kein Druck auf	Pumpe nicht festgeschraubt	► Schrauben Sie die Pumpe fest ein.
	O-Ring an der Pumpe defekt	► Lassen Sie das Gerät vom Hilti Service reparieren.
	Manschette defekt	► Lassen Sie das Gerät vom Hilti Service reparieren.
Flüssigkeit dringt oben aus der Pumpe	Ventilscheibe verschmutzt oder defekt	► Reinigen Sie die Ventilscheibe oder lassen Sie das Gerät vom Hilti Service reparieren.
Sicherheitsventil bläst zu früh ab	Sicherheitsventil defekt	► Lassen Sie das Gerät vom Hilti Service reparieren.
Manometer zeigt keinen Behälterdruck an	Manometer defekt	► Lassen Sie das Gerät vom Hilti Service reparieren.

9 Entsorgung

Werfen Sie dieses Produkt nicht in den Hausmüll!

Hilti Geräte sind zu einem hohen Anteil aus wiederverwertbaren Materialien hergestellt. Voraussetzung für eine Wiederverwertung ist eine sachgemäße Stofftrennung. In vielen Ländern nimmt **Hilti** Ihr Altgerät zur Verwertung zurück. Fragen Sie den **Hilti** Kundenservice oder Ihren Verkaufsberater.

10 Herstellergewährleistung

► Bitte wenden Sie sich bei Fragen zu den Gewährleistungsbedingungen an Ihren lokalen **Hilti** Partner.

11 Weitere Informationen

Weiterführende Informationen zu Bedienung, Technik, Umwelt und Recycling finden Sie unter folgendem Link: qr.hilti.com/manual/?id=247636

Diesen Link finden Sie auch am Ende der Dokumentation als QR-Code.

12 Herstellerinformationen

Die Produkte HILTI DWP10 der Baureihe 3585 erfüllen die Anforderung der Druckgeräte-Richtlinie 2014/68/EU und tragen die CE-Kennzeichnung.

Bitte wenden Sie sich bei Fragen zu den Garantiebedingungen an ihren lokalen **Hilti** Partner.

Original operating instructions

1 Information about the operating instructions

1.1 About these operating instructions

- **Warning!** Read and understand all accompanying documentation, including but not limited to instructions, safety warnings, illustrations, and specifications provided with this product. Familiarize yourself with all the instructions, safety warnings, illustrations, specifications, components, and functions of the product before use. Failure to do so may result in electric shock, fire, and/or serious injury. Save all warnings and instructions for future reference.
- products are designed for professional users and only trained, authorized personnel are permitted to operate, service and maintain the products. This personnel must be specifically informed about the possible hazards. The product and its ancillary equipment can present hazards if used incorrectly by untrained personnel or if used not in accordance with the intended use.

- The accompanying documentation corresponds to the current state of the art at the time of printing. Please always check for the latest version on the product's page on Hilti's website. To do this, follow the link or scan the QR code in this documentation, marked with the symbol
- Ensure that these operating instructions are with the product when it is given to other persons.

1.2 Explanation of symbols

1.2.1 Warnings

Warnings alert persons to hazards that occur when handling or using the product. The following signal words are used:

DANGER

DANGER !

- Draws attention to imminent danger that will lead to serious personal injury or fatality.

WARNING

WARNING !

- Draws attention to a potential threat of danger that can lead to serious injury or fatality.

CAUTION

CAUTION !

- Draws attention to a potentially dangerous situation that could lead to personal injury or damage to the equipment or other property.

1.2.2 Symbols in the operating instructions

The following symbols are used in these operating instructions:

	Comply with the operating instructions
	Instructions for use and other useful information
	Dealing with recyclable materials
	Do not dispose of electric equipment and batteries as household waste
	Hilti Li-ion battery
	Hilti charger

1.2.3 Symbols in illustrations

The following symbols are used in illustrations:

2	These numbers refer to the illustrations at the beginning of these operating instructions.
3	The numbering reflects the sequence of operations shown in the illustrations and may deviate from the steps described in the text.
11	Item reference numbers are used in the overview illustration and refer to the numbers used in the key in the product overview section.
	These characters are intended to specifically draw your attention to certain points when handling the product.

1.3 Product-dependent symbols

1.3.1 Symbols on the product

The following symbols are used on the product:

	Wear eye protection
--	---------------------

	Wear light respiratory protection
	Wear protective clothing

1.4 Product information

HILTI products are designed for professional users and only trained, authorized personnel are permitted to operate, service and maintain the products. This personnel must be specifically informed about the possible hazards. The product and its ancillary equipment can present hazards if used incorrectly by untrained personnel or if used not in accordance with the intended use.

The type designation and serial number are printed on the rating plate.

- Write down the serial number in the table below. You will be required to state the product details when contacting Hilti Service or your local Hilti organization to inquire about the product.

Water supply unit	DWP 10
Generation:	01
Serial number:	

2 Safety

2.1 General safety instructions

⚠ WARNING Study all safety instructions and other instructions, images and technical data with which this product is provided.

Keep all safety precautions and instructions for future reference.

Work area safety

- Keep your work area clean and well lit.** Cluttered or dark work areas invite accidents.
- Do not operate the machine in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.
- Make sure that the product cannot roll away or fall down.
- Do not transport the product by crane or with hoists. The product has to be depressurized for transport.

Personal safety

- Stay alert, watch what you are doing and use common sense when working with the product. Do not use a product while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating the product can result in serious personal injury.
- Wear your personal protective equipment and always wear protective glasses.** Depending on the type of product you are using and its purpose, wearing personal protective equipment such as a dust mask, non-slip safety shoes, hard hat, or hearing protection reduces the risk of injury.
- Avoid unusual body positions. Keep proper footing and balance at all times.**
- Wear suitable work clothes. Do not wear jewelry or loose clothing. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewelry or long hair can be snagged by moving parts.
- Comply with national health and safety requirements.
- When pumping, always keep the pressure gauge under observation so as not to exceed the maximum spray pressure.** The product has to be depressurized before filling, after use, before maintenance work is undertaken and for storage.

Careful handling and use of the product

- Use the product and accessories only when they are in perfect working order.
- Never tamper with or modify the product or accessories in any way.
- Keep children and everyone else at a safe distance while the product is in use.**
- Only persons who are familiar with it, who have been trained on how to use it safely and who understand the resulting hazards are permitted to use the product. The product is not intended for use by children. Children must be supervised to ensure that they do not play with the product.
- At temperatures below the freezing point, make sure that no water remains in the product. Freezing water can cause damage when it expands inside components of the product.
- Always use compressed air to blow out hoses and valves.** This helps prevent contact with substances that could be hazardous to health.

- ▶ Do not leave the product in the sun. Make sure that the product is not heated above the maximum operating temperature. Protect the product from frost and ammonia.
- ▶ Use the product in combination with water only. Do not pour chemicals or other liquids into the tank.
- ▶ Fill the product with clean water only. Foreign matter can cause damage to the pump. Keep the tank free of sand, drilling slurry and other foreign matter.
- ▶ Take the influences of the surrounding area into account. Do not use the appliance where there is a risk of fire or explosion.
- ▶ Store the product in a secure place when not in use. Products which are not in use must be stored in a dry, high place or locked away out of reach of children.

Service

- ▶ **Have your product repaired only by qualified, skilled personnel, using only genuine Hilti spare parts.** The safety of the product can thus be maintained.

3 Description

3.1 Product overview 1

3.2 Intended use

The product described here is a water pressure tank for distributing coolants and flushing liquids on drilling rigs, concrete saws or angle grinders. Water is generally used for this purpose.

3.3 Possible misuse

This product is not suitable for:

- Flammable liquids
- Hydrogen peroxide and similar oxygen emitting media
- Caustic substances (certain disinfectants and impregnating agents, acids, alkaline solutions)
- Liquids containing ammonia
- Solvents and liquids containing solvents
- Viscous or sticky liquids or those that form residues (paints, grease)
- Use in food sector

This product may not be used under any circumstances:

- With external pressure sources
- For warehousing and storage of liquids
- As an eye wash

3.4 Items supplied

Tank with pump, hose with connectors, operating instructions

Other system products approved for use with this product can be found at your local **Hilti Store** or at: www.hilti.group

4 Product properties

The tank material consists of steel with a polyester coating.

Tare weight	5.2 kg
Total content	13 ℓ
Maximum filling quantity	10 ℓ
Technical residual quantity	0.03 ℓ
Maximum operating pressure	6 bar
Maximum operating temperature	40 °C

5 Preparations at the workplace

5.1 Assembling water supply unit 2

1. Check that the tank, pump and hose are undamaged before assembly.
2. Connect the hose to the outlet (1).
3. Pump the pressure in the empty water supply unit up to 2 bar (2).
 - ▶ The pressure must not drop by more than 0.5 bar within 30 minutes!
4. Check by pulling the red button of the safety valve (3).
 - ▶ The pressure must be released.

5.2 Filling and preparing water supply unit 3, 4

1. Pull up the red button of the safety valve until the tank is completely depressurized (1).
2. Push the pump handle down and turn the pump handle counter-clockwise (2).
 - ▶ The pump handle is locked.
3. Unscrew the pump from the tank (3).
4. Pour the water into the tank (4).
5. Check the fill level in the hose.
6. Pass the transparent hose several times from top to bottom beside the tank (5).

The liquid levels in hose and tank equalize. The liquid level visible in the hose now corresponds to the fill level in the tank, which you can read from the scale.

7. Screw the pump into the tank (6).
8. Push the pump handle down and turn the pump handle clockwise (1).
 - ▶ The pump handle is unlocked (2).
9. Build up pressure in the tank to approx. 2 bar (3).
 - ▶ The maximum pressure should not exceed 6 bar (red line on the pressure gage).
 - ▶ If the maximum pressure is exceeded, the safety valve is actuated and releases the excess pressure.
10. Push the pump handle down and turn it counterclockwise.
 - ▶ The pump handle is locked.

6 Operation

6.1 Use 5

1. Connect the plug-in connector of the pressurized water tank to the plug-in nipple (1).
2. Actuate the ball valve.
 - ▶ The liquid supply begins.
 - ▶ The liquid quantity can be regulated with the ball valve.
3. When pressure drops below 1 bar, operate the pump again to build up pressure (2).
4. Refill the tank when it is empty 10.

6.2 After use

1. Pull up the red button of the safety valve until the tank is completely depressurized.
2. Close the ball valve and disconnect the plug-in connector from the plug-in nipple (1).
3. Lock the pump handle.
4. Screw the pump out of the tank.
5. Drain the remaining water from the tank.
6. Wipe off the water supply unit with a damp cloth.
7. Coil the hose round the tank and seat the plug-in connector on the locating pin of the water supply unit (2).
8. Keep the water supply unit in a dry, frost-free environment protected from direct sunlight for drying and storage.

7 Care and maintenance

7.1 Care and maintenance work

1. Check the unit at regular intervals.
 - We recommend having an expert conduct an external inspection every 2 years and an internal inspection every 5 years, as well as a strength test every 10 years
2. Dismantle the pump [1] and grease the O-ring [a] is and the sleeve [b].
3. Always carry out this maintenance after using the unit 50 times, however at least once a year!

To help ensure safe and reliable operation, use only genuine Hilti spare parts and consumables. Spare parts, consumables and accessories approved by Hilti for use with the product can be found at your local **Hilti Store** or online at: **www.hilti.group**.

8 Troubleshooting

If the trouble you are experiencing is not listed in this table or you are unable to remedy the problem by yourself, please contact **Hilti Service**.

8.1 Troubleshooting table

Trouble or fault	Possible cause	Action to be taken
The water supply unit does not build up any pressure	Pump is not screwed on tightly	► Screw on the pump tightly.
	O-ring on the pump is defective	► Have the power tool repaired by Hilti Service .
	Sleeve is defective	► Have the power tool repaired by Hilti Service .
Liquid escapes from the pump at the top	Valve disk is dirty or defective	► Clean the valve disk or have the unit repaired by Hilti Service .
Safety valve vents too early	Safety valve is defective	► Have the tool repaired by Hilti Service .
Pressure gage indicates no tank pressure	Pressure gage is defective	► Have the power tool repaired by Hilti Service .

9 Disposal

Do not dispose of this product in household waste!

Most of the materials from which **Hilti** tools, appliances and devices are manufactured can be recycled. The materials must be correctly separated before they can be recycled. In many countries, your old tools, machines or appliances can be returned to **Hilti** for recycling. Ask **Hilti Service** or your Hilti sales representative for further information.

10 Manufacturer's warranty

- Please contact your local **Hilti** representative if you have questions about the warranty conditions.

7 Onderhoud en verzorging

7.1 Schoonmaak- en onderhoudswerkzaamheden 7

1. Controleer het apparaat regelmatig.
 - Wij adviseren om de 2 jaar een externe test en om de 5 jaar een interne test en daarnaast om de 10 jaar een sterktest door een gekwalificeerd persoon
2. Haal de pomp uit elkaar [1] en smeer de O-ring en de manchet [b] in.
3. Voer deze onderhoudswerkzaamheden altijd uit nadat het apparaat 50 keer is gebruikt, maar ten minste eenmaal per jaar!

Voor een veilig gebruik alleen originele vervangingsonderdelen en verbruiksmaterialen gebruiken. Door ons vrijgegeven vervangingsonderdelen, verbruiksmaterialen en toebehoren voor uw product vindt u in uw **Hilti Store** of onder: **www.hilti.group**.

8 Hulp bij storingen

Bij storingen die niet in deze tabellen zijn aangegeven of die niet zelf kunnen worden verholpen, kunt u zich tot onze **Hilti service** wenden.

8.1 Storingstabel

Storing	Mogelijke oorzaak	Remedie
In het watertoevoerapparaat wordt geen druk opgebouwd	Pomp is niet vastgeschroefd	► Schroef de pomp stevig vast.
	O-ring van de pomp is defect	► Laat het apparaat door de Hilti Service repareren.
	Manchet is defect	► Laat het apparaat door de Hilti Service repareren.
Vloeistof ontsnapt aan de bovenzijde van de pomp	Klepschijf is vuil of defect	► Reinig de klepschijf of laat het apparaat door de Hilti Service repareren.
Veiligheidsklep blaast te snel af	Veiligheidsklep is defect	► Laat het apparaat door de Hilti Service repareren.
Manometer geeft geen druk in het reservoir aan	Manometer is defect	► Laat het apparaat door de Hilti Service repareren.

9 Recycling

Geef dit product niet met het huisvuil mee!

Hilti apparaten zijn voor een groot deel vervaardigd uit materialen die kunnen worden gerecycled. Voor recycling is een juiste materiaalscheiding noodzakelijk. In een groot aantal landen neemt **Hilti** uw oude apparaat voor recycling terug. Vraag hiernaar bij de klantenservice van **Hilti** of bij uw verkoopadviseur.

10 Fabrieksgarantie

- Neem bij vragen over de garantievoorzwaarden contact op met uw lokale **Hilti-dealer**.

11 Meer informatie

Meer informatie over bediening, technologie, milieu en recycling vindt u onder de volgende link: **qr.hilti.com/manual/?id=247636**

Deze link vindt u ook aan het einde van de documentatie als QR-code.

12 Informatie fabrikant

De **HILTI DWP10**-producten uit de 3585-serie voldoen aan de eisen van de Richtlijn Drukapparatuur 2014/68/EU en dragen de CE-markering.

Neem bij vragen over de garantievoorzwaarden contact op met uw lokale **Hilti-dealer**.
