KSC 60 and KS 120 Sliding Compound Miter Saw Combos

The KAPEX KSC 60 cordless sliding compound miter saws produce unbeatably precise cross cuts – in an enormous range of applications with miter angles of up to 60° on each side and bevel angles of up to 47° on each side. The twin-column guide with two bearings ensures that the saw blade is guided smoothly and with precision whichever setting is chosen: This makes every cut perfect, without wobble or deflection. In conjunction with the dual battery system, the brushless EC-TEC motor provides virtually unlimited endurance and is enough for all typical applications for an entire day's work. And finally, clever details such as the variable speed, saw blades for every application, bevel, ergonomic underframe and dust bag create the ultimate experience in precision, durability, and performance.

The KAPEX is the most advanced sliding compound miter saw in the market today — making cuts that rival the finest trim work. Light in weight and heavy in features, the KS 120 is the perfect saw for the workshop or the jobsite. Effective dust extraction, precise cuts, easy adjustments, and quality components are some of the features that should make this saw the number one choice of professional tradesmen.

Precise: Twin-column guide with two bearings ensures that the saw blade is guided smoothly and with precision

Mobile: Low weight, compact design

Flexible: Extension table for the stable support of longer workpieces
