Light Module: Better view thanks to light

The LED light ring is directly integrated into the base panel and provides shadow free lighting directly on the workpiece all the way around. The separate battery unit is removable as required and can be recharged via the USB-C interface. The light can be retrofitted to all OF 1010 REBQ models starting from production month 09/2021.

Light Module

Light Module LM-OF 1010 R
