Winter Water's Worth

In winter's cold, the buckets freeze,
But animals still need water, please!
With water frozen, they can't drink right,
Dehydration could be their plight.
Hydration keeps their health in check,
It prevents illness, all hands on deck!
Water aids digestion, keeps them strong,
And helps them thrive all winter long.
Make sure the water is clean and ice free,
For all animals' health and energy!
